

## Classification of Rimex's Finished Products under REACH

Rimex manufactures and sells finishes on stainless steel and other metals applied by various mechanical and chemical processes.

**Under REACH, Rimex is classified as a 'Downstream User'.**

The sheets, tubes, coils and components of stainless steel (and other metals) processed and supplied by Rimex are classified under **REACH** as articles and not preparations or substances. Therefore, the materials supplied by Rimex to its customers do not require registration under **REACH**.

Rimex does use chemical preparations and substances in some of its finishing processes and, where appropriate and necessary, Rimex has taken all necessary steps to ensure preparations and substances are registered.

Rimex has achieved the **Environmental Systems Certification ISO 14001** and **Quality Systems Certification ISO 9001**.
